Context & Challenges

For this aerospace manufacturer, **securing revenue and ensuring OTD** was becoming more and more difficult

Value at stake

25% YoY Growth

37% Revenue Blocked by Part Shortages

64% Delivery Delays Due to Part Shortages

Parts produced

Flight actuators

700

Part numbers

6

BoM levels

200

Suppliers

At a more granular level, each team had its own challenges

Production Control

Anticipate production blockers, increase planning adherence.

S&OP

Optimize detailed production schedules based on resource availability

Purchasing

Synchronize orders with real production needs: avoiding shortages while controlling cash & inventories

MRO Logistics

Reduce logistical TAT and spot process gaps

Due to daily supply chain disruptions, factory teams were facing highly **volatile & complex** environments

Daily disruptive factors occurring frequently...

Part shortages

Late supplier deliveries

Quality issues

Specific customer requests

...hindered factory operations...

Difficulties to **align teams & prioritize subjects**

Time consuming spreadsheets maintenance

Firefighting mode creating high stress levels amongst teams

Lack of visibility on factory forecasts & performance

...affecting supply chain performance

Delayed **customer deliveries**

Costly **last minute solutions**

Higher **inventory & WIP level**

Sub-optimal **manpower management**

On the operational level, these disruptions represented **multiple variables to be adjusted daily**

- ▶ Late supplier delivery
- ▶ Quality issue
- ▶ Demand change
- ▶ Delayed operations
- ▶ Machine unavailable
- ▶ Multiple spreadsheets to update
- ▶ Etc....

▶ **300k+**
impacted
data points

▶ **7**
teams to
coordinate

Derogation
requests

Process latency, inaccurate data and inadapted tooling made the daily adjustment to these disruptions even more challenging

198h/day adjustments to factory disruptions

Data preparation & analysis

Cross-functional collaboration

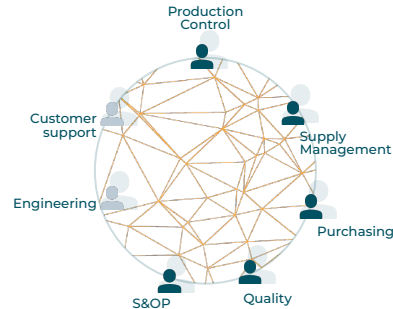

▶ Multiple data tables required

▶ Ad hoc Excel & Dashboards

▶ Complex cross-functional coordination

Wrong decisions taken as they were based on:

- ▶ Inaccurate information
- ▶ Siloed data
- ▶ Partial data

On the emotional level, these disruptions led operational teams to experience **stress & frustration**

Surprises in production are stressing us, sometimes in meetings, I just lose control. I don't want surprises anymore.

*Christine A.
S&OP*

Difficulties to prioritize subjects because of scattered data

Struggles to justify results in front of leadership due to lack of forecast

Complicated team alignment due to siloed data and competing objectives

Cognitive workload by cause of growing complexity and speed at which the environment is changing

Constant firefighting caused by daily last minute supply chain disruption

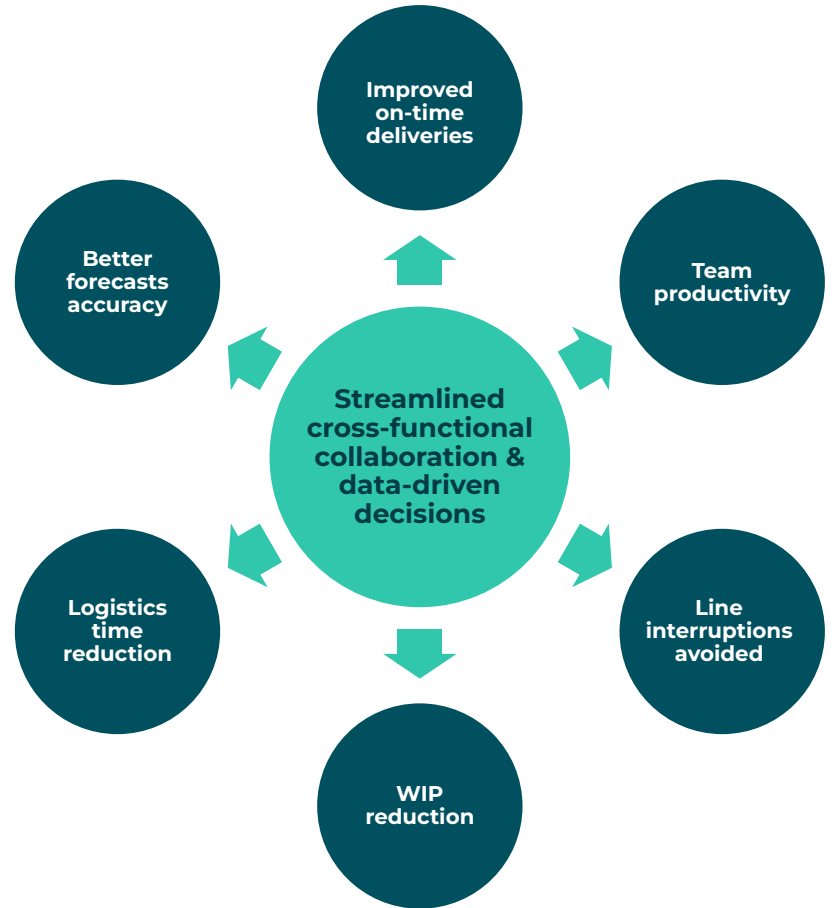

Work-life balance difficult to achieve because of increased overtime

Approach

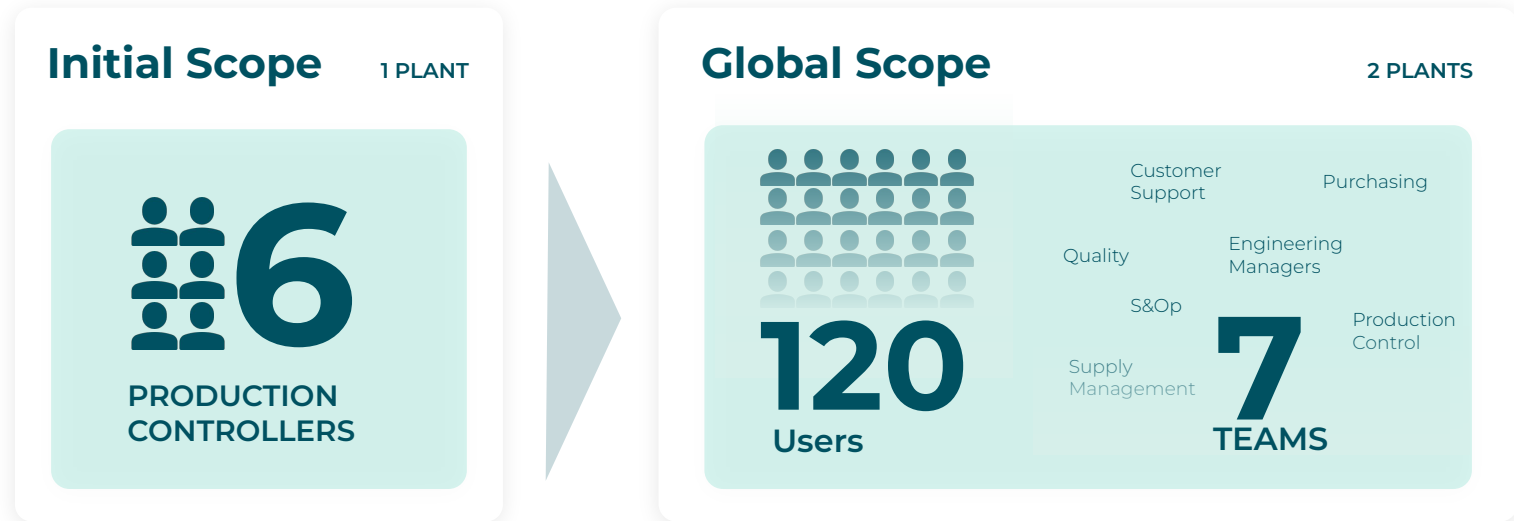

To address the challenges faced by its teams, this leading aerospace manufacturer partnered with Pelico

The global objective: leave the parallel universe of spreadsheets, streamline cross-functional collaboration and improve the overall factory performance.

The manufacturer opted for an iterative approach to achieve a **silent transformation**

To ensure its **digital transformation** would be smooth and time-efficient, **the group adopted an iterative approach, starting with a team** of production controllers.

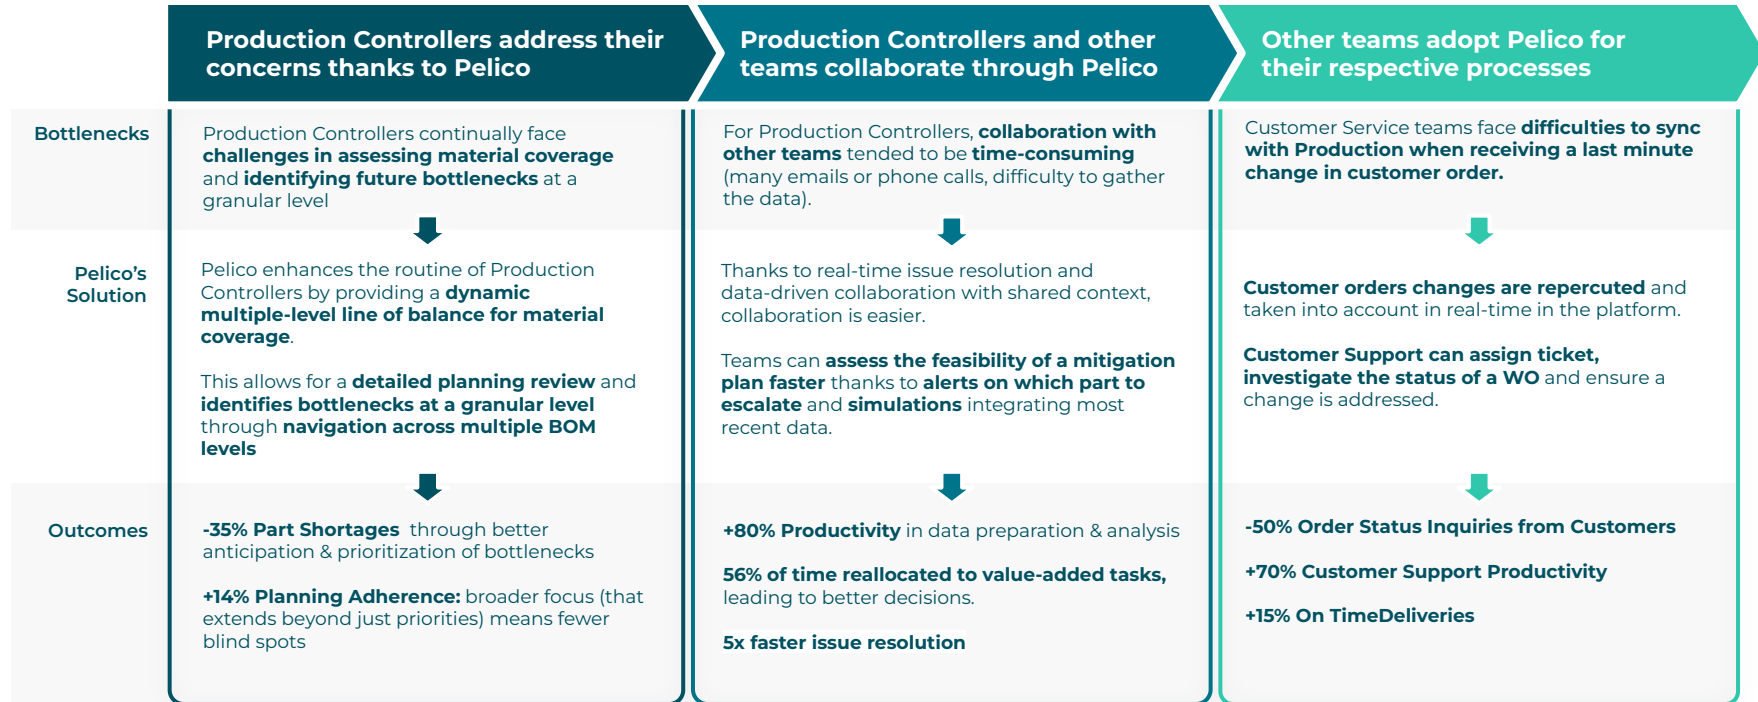

💡 DATA and DATA CLEANING: At every step of the process, Pelico provided support regarding data, and collaborated with IT-services. The support provided notably encompassed Platform Set Up & Security review, Apps Config & Deployment, Data Mapping for routines and ETL as well as Custom Data Integration & Refinements.

How it went: Initial Scope

To avoid a long and extensive process change, Pelico's setup is done by gradual iterative & deployments

Pelico embedded in existing routines and made progressive deployments to support the teams' processes and foster adoption.

A holistic methodology resulting in a successful silent transformation

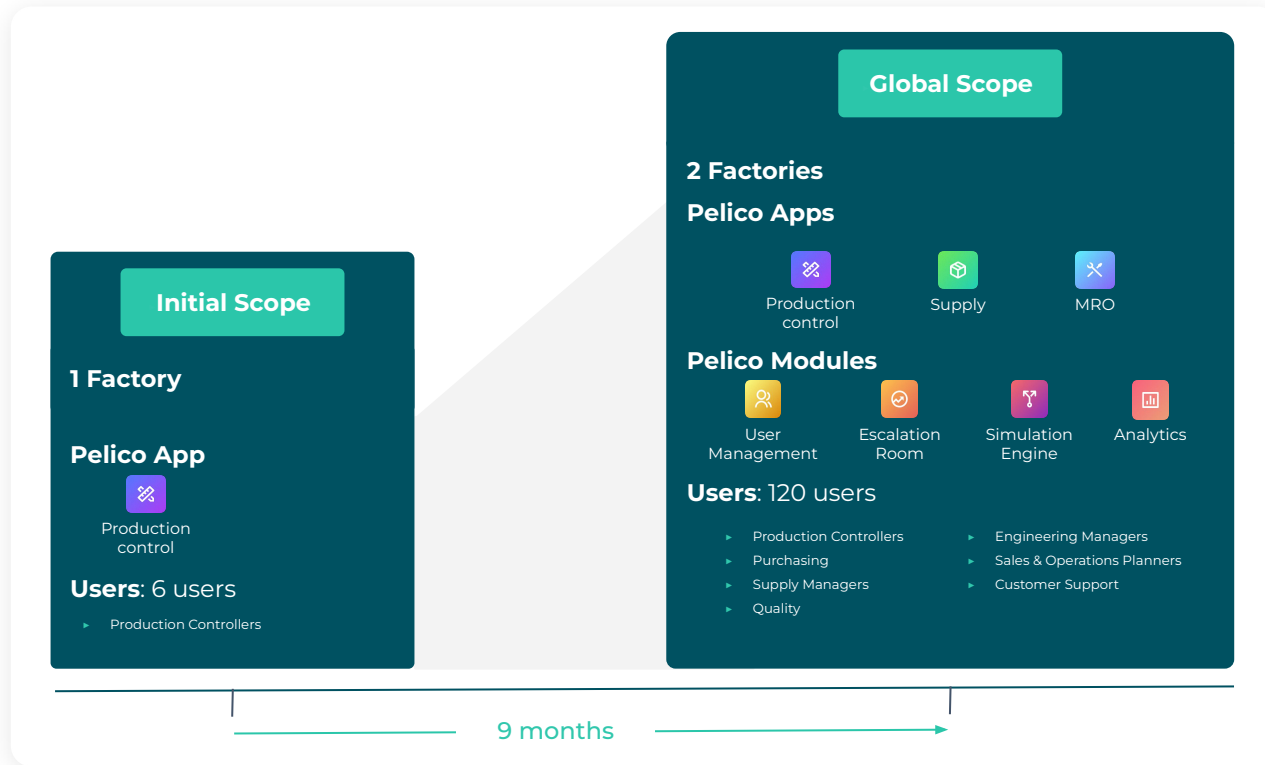

Thanks to Pelico's approach, teams of this aerospace manufacturer gradually adopted the platform.

How it went: From Initial to Global Scope

Within 9 months, Pelico has become a cornerstone of digitized factory operations

Thanks to multidisciplinary experts from Pelico, **all teams smoothly adopted the platform and left the parallel universe of spreadsheets**

6 Kaizen sessions with users

24/7 Data monitoring & alerting

Data health checks

Trilingual support

20+ Platform video tutorials

Thanks to comprehensive training and support, the factory teams quickly ramped up on the Pelico platform.

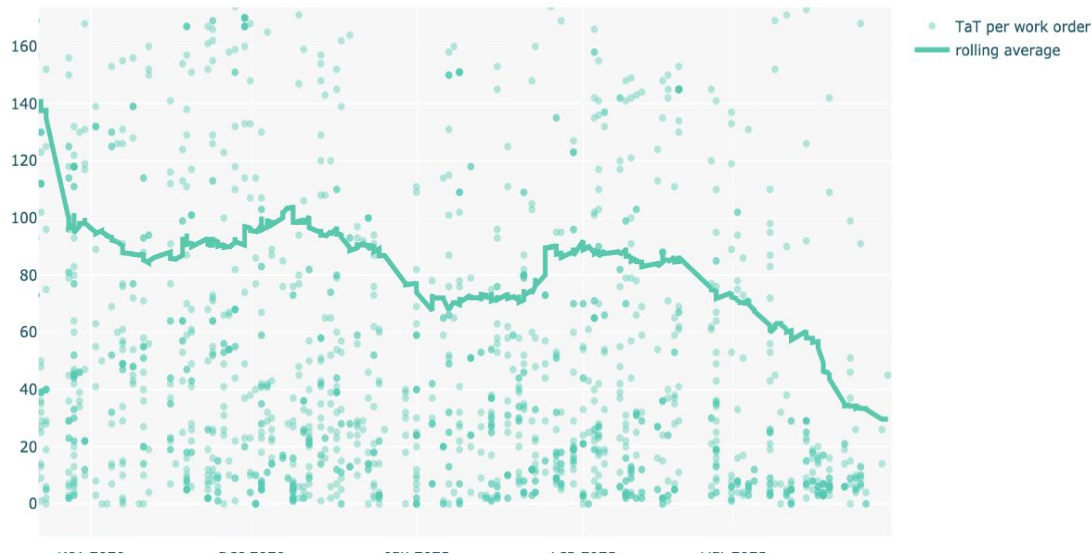

Within a few weeks following Pelico's deployment, MRO teams experienced significant results

18%
WIP reduction

50%
Reduction of
logistics cycle
times

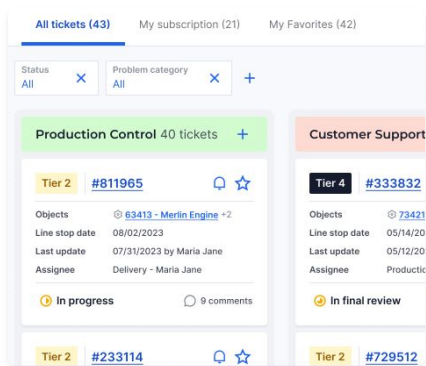

Turnaround Time | Gate 0-2 inclus

Pelico reached 97% user adoption rate (high and fast user adoption)

Escalation Room

As often, the **Escalation Room App** played a major part in the quick adoption of Pelico. From this Pelico Platform App, each team can create an escalation ticket, escalate an issue, and identify a colleague on a ticket to investigate the status of the part shortages.

Extensive user adoption across teams

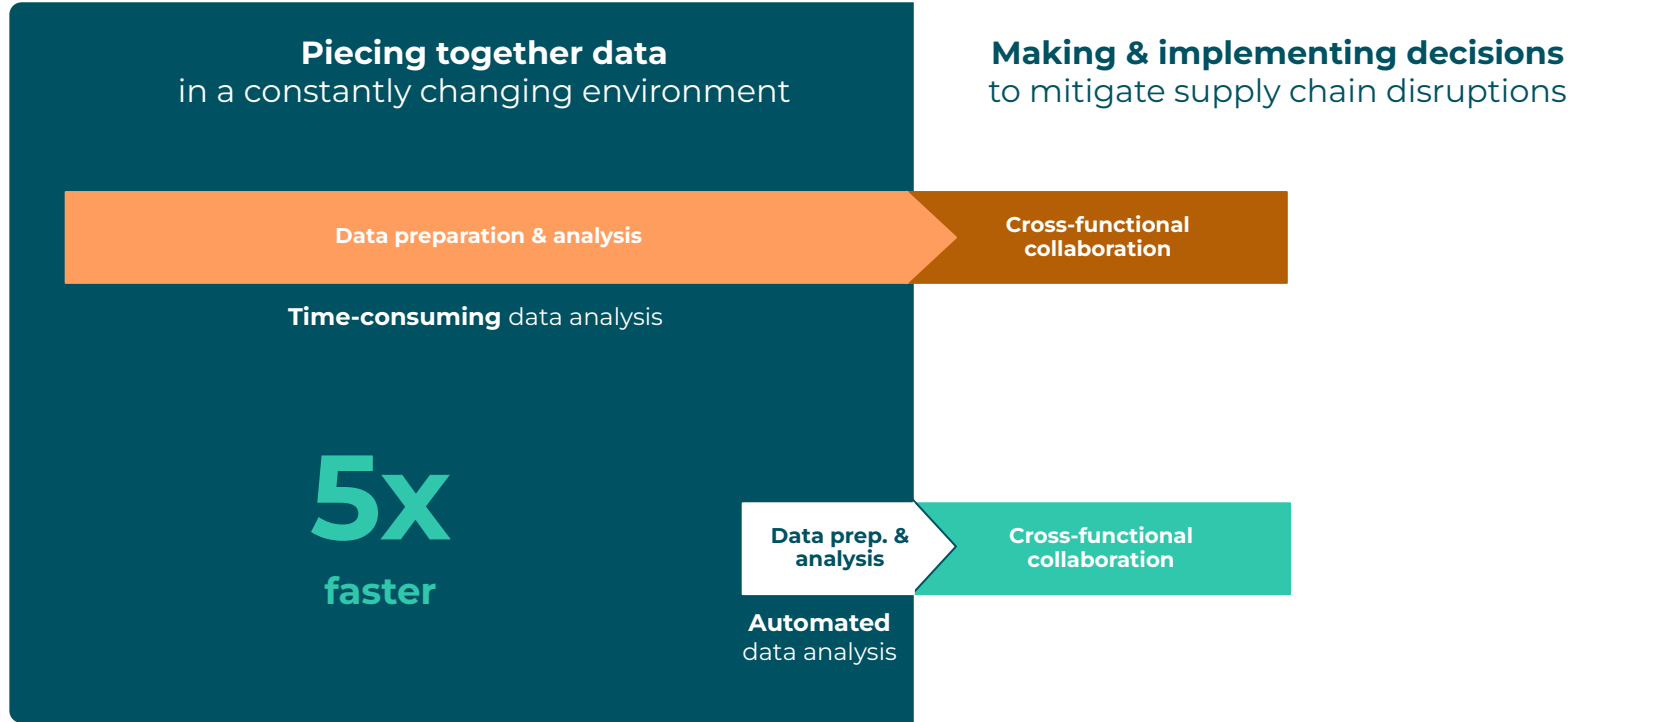

Weekly unique visitors

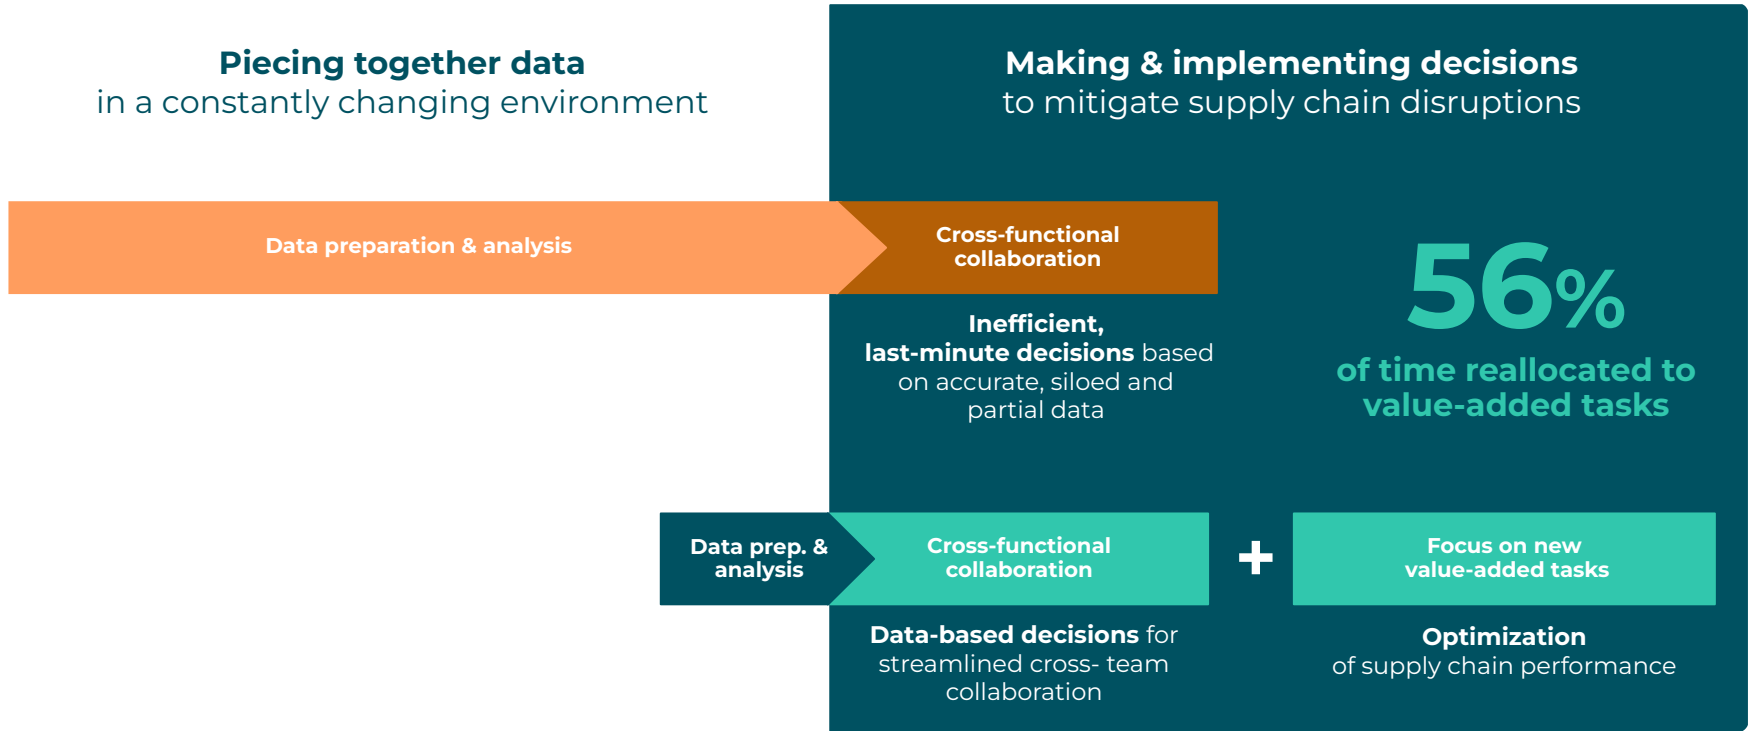

How it is going now

Productivity improved by 80% in data preparation & analysis, leading to decisions made 5x faster

Better decisions and 56% of time reallocated to value-added tasks

Today, Pelico is at the heart of the daily routines of 7 operational teams from 2 factories

Behind the Scenes: What Users Say

MRO

“Thanks to the different features of Pelico, on the MRO side, our WIP went from 2,000 work orders to 1,600 work orders in a year. This is due to the fact that the Production Control team re-oriented their focus on problem-solving and the implementation of corrective actions rather than low added-value activities.”

Hakim B.

MRO operations

“Emails were reduced by 20% thanks to Pelico’s cross-functional collaborative platform. All teams gained around 15 hours per week as they spent less time looking for siloed information and re-oriented their focus on the implementation of prioritized mitigation actions.”

Matthias B.

Production Control

Supply Chain

“Pelico helped us re-orient our teams’ focus on real value-added activities by providing us with structured & organized data, which enabled us to easily identify bottlenecks & spend more time to manage & solve them. It also streamlined cross-functional collaboration and got us out of working in silos mode towards real teamwork & great synchronization on our action plans.”

Pauline C.
Supply Chain Director

“Our dedicated Pelico team worked closely with our teams. They spent time with them to truly understand their need and processes. This proximity enabled a swift adoption of change and a strong user adoption.”
